# Storm Debi Marine Storm Report Marine Unit

Report Date: 20 August 2025

Report Time: 13:41 UTC

### **Storm Overview**

Dates: 2023-11-13, 2023-11-14

**Description:** Rapidly developing storm bringing damaging winds and heavy rainfall.

Peak Winds: 110+ km/h

Areas Affected: West Coast, Northwest, Midlands

# **Marine Observations Summary**

#### **Data Sources**

- Buoy 62091 (M1 Buoy): 53.47°N, 5.42°W West Coast
- Buoy 62092 (M2 Buoy): 53.48°N, 5.42°W West Coast
- Buoy 62093 (M3 Buoy): 51.22°N, 6.70°W Southwest Coast
- Buoy 62094 (M4 Buoy): 51.69°N, 6.70°W Southwest Coast
- Buoy 62095 (M5 Buoy): 53.06°N, 7.90°W West Coast

#### **Peak Conditions Observed**

• Maximum Wind Speed: 39.8 m/s (143.1 km/h) at Buoy 62091

- Maximum Significant Wave Height (Hm0): 6.1 m at Buoy 62095
- Maximum Wave Height (Hmax): 10.3 m at Buoy 62095
- Minimum Pressure: 979.0 hPa at Buoy 62091
- Temperature Range: 9.4°C (Buoy 62093) to 14.5°C (Buoy 62091)
- Total Observations: 920 records from 5 stations (QC good data only)

#### **Station-by-Station Analysis**

### **Buoy 62091 - M1 Buoy**

• Location: 53.47°N, 5.42°W

Region: West Coast

Peak Wind Speed: 39.8 m/s (143.1 km/h)
Peak Significant Wave Height (Hm0): 3.8 m
Peak Maximum Wave Height (Hmax): 6.9 m

• Minimum Pressure: 979.0 hPa

Data Quality: Excellent (100.0% good data)
Observations: 182 records (QC good data only)

### **Buoy 62092 - M2 Buoy**

• Location: 53.48°N, 5.42°W

Region: West Coast

Peak Wind Speed: 33.6 m/s (121.0 km/h)
Peak Significant Wave Height (Hm0): 6.0 m
Peak Maximum Wave Height (Hmax): 10.0 m

• Minimum Pressure: 983.5 hPa

Data Quality: Excellent (100.0% good data)
Observations: 194 records (QC good data only)

### Buoy 62093 - M3 Buoy

Location: 51.22°N, 6.70°W
Region: Southwest Coast

Peak Wind Speed: 28.5 m/s (102.5 km/h)
Peak Significant Wave Height (Hm0): 5.1 m
Peak Maximum Wave Height (Hmax): 9.8 m

• Minimum Pressure: 980.7 hPa

Data Quality: Excellent (100.0% good data)
Observations: 184 records (QC good data only)

### Buoy 62094 - M4 Buoy

Location: 51.69°N, 6.70°WRegion: Southwest Coast

Peak Wind Speed: 33.9 m/s (122.2 km/h)
Peak Significant Wave Height (Hm0): 5.7 m
Peak Maximum Wave Height (Hmax): 9.1 m

• Minimum Pressure: 986.2 hPa

Data Quality: Excellent (100.0% good data)
Observations: 172 records (QC good data only)

#### **Buoy 62095 - M5 Buoy**

Location: 53.06°N, 7.90°W

• Region: West Coast

Peak Wind Speed: 26.1 m/s (93.9 km/h)
Peak Significant Wave Height (Hm0): 6.1 m
Peak Maximum Wave Height (Hmax): 10.3 m

• Minimum Pressure: 982.5 hPa

Data Quality: Excellent (100.0% good data)
Observations: 188 records (QC good data only)

### **Meteorological Analysis**

### **Wind Analysis**

The storm produced maximum sustained winds of **39.8 m/s** (143.1 km/h), representing significant marine weather conditions. Wind speeds of this magnitude pose considerable risks to marine operations and coastal areas.

#### Wind Categories:

Force 7 (Strong Gale): 13.9-17.1 m/s (50-61 km/h)

• Force 8 (Gale): 17.2-20.7 m/s (62-74 km/h)

• Force 9 (Strong Gale): 20.8-24.4 m/s (75-88 km/h)

• Force 10+ (Storm): >24.5 m/s (>88 km/h)

### **Wave Analysis**

**Significant Wave Heights (Hm0):** Peak values reached **6.1 m**, representing **high** sea states according to the World Meteorological Organization classification.

**Maximum Wave Heights (Hmax):** Individual wave heights peaked at **10.3 m**, representing **very high** conditions for maximum wave heights.

Wave Height Relationship: The Hmax/Hm0 ratio was 1.69, within normal range (1.3-1.8).

#### Sea State Classification (Hm0):

• Rough: 2.5-4.0 m

Very Rough: 4.0-6.0 m

• High: 6.0-9.0 m

Very High: 9.0-14.0 mPhenomenal: >14.0 m

#### **Wave Height Definitions:**

- Hm0 (Significant Wave Height): Average height of the highest one-third of waves
- Hmax (Maximum Wave Height): Highest individual wave recorded during the period

### **Pressure Analysis**

Atmospheric pressure dropped to a minimum of **979.0 hPa**, representing a pressure anomaly of 34.2 hPa below standard atmospheric pressure (1013.25 hPa).

#### **Pressure Categories:**

Normal: 1013-1023 hPa
Low: 1000-1013 hPa
Very Low: 980-1000 hPa
Extremely Low: <980 hPa</li>

### **Storm Timeline**

Storm Period: 2023-11-12 00:00 to 2023-11-16 00:00 UTC

Duration: 4 days, 0 hours

#### **Key Timeline Points:**

Storm approach: Pressure began dropping and winds increased

Peak intensity: Maximum winds and waves recorded

Storm passage: Gradual improvement in conditions

# **Quality Control Summary**

Total Records: 920

#### QC Status Distribution:

Good Data (QC=1): 920 records (100.0%)
Adjusted Data (QC=5): 0 records (0.0%)

• Failed QC (QC=4): 0 records (0.0%)

• Missing Data (QC=9): 0 records (0.0%)

• No QC (QC=0): 0 records (0.0%)

### **Data Visualization**

!Storm Overview

Figure 1: Comprehensive marine meteorological analysis showing wind speed, wave height, atmospheric pressure, air temperature, wind direction, and wave period during Storm Debi.

### **Technical Notes**

### **QC Methods Applied**

- Manual QC: Visual inspection and expert validation
- Automatic QC: Range checks, spike detection, and flat-line identification
- Al-powered QC: Machine learning algorithms for anomaly detection

### **Data Quality Indicators**

- 0: No QC performed
- 1: QC performed, data OK
- 4: QC performed, raw data not OK and not adjusted
- 5: QC performed, raw data not OK but value adjusted/interpolated
- 6: QC performed, data OK (Datawell Hmax sensor specific)
- 9: Data missing

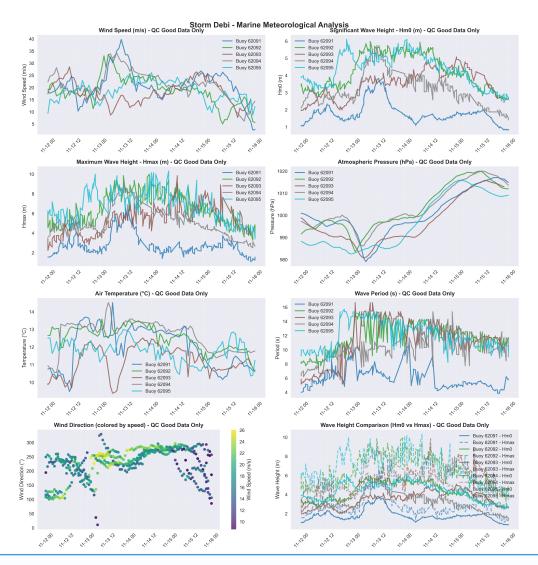

#### **Measurement Uncertainties**

- Wind Speed: ±0.3 m/s
- Wave Height: ±5% or 0.5m (whichever greater)
- Atmospheric Pressure: ±0.5 hPa
- Air Temperature: ±0.2°C

---

Report generated by Marine Storm Analysis System Data source: Irish Marine Data Buoy Network Quality controlled data from Met Éireann marine observations

# **Marine Meteorological Analysis**

**Figure 1:** Marine meteorological observations during Storm Debi. Eight-panel analysis showing wind speed, significant wave height (Hm0), maximum wave height (Hmax), atmospheric pressure, air temperature, wave period, wind direction patterns, and comparative wave heights across the Irish Marine Data Buoy Network. Quality-controlled data only.
